## Forever iVision™

### Complete eye support for the digital age.

In today's digital age, our eyes work harder than ever before. We count on them to filter out UV rays and pollution, but also subject our eyes to hours of artificial blue light coming from mobile devices, computers and televisions every day. Taking care of our eyes is more important than ever to protect from eye strain and long-term damage. And while proper nutrition is the first line of defense, most diets fall far short of the recommended levels of eye-promoting nutrients and antioxidants.

Introducing Forever iVision™, a breakthrough supplement designed to make it easier than ever to nourish and protect your eyes. This formula is loaded with vitamins, antioxidant power, botanicals and scientifically-advanced ingredients for complete, modern day eye support.

Forever iVision™ includes bilberry extract, vitamins C and E to contribute to the protection of cells from oxidative stress and beta carotene from vitamin A, a nutrient found in carrots and other foods, that contributes to the maintenance of normal vision. Forever boosted the power of beta carotene with the addition of zinc, which contributes to the maintenance of normal vision and to the normal metabolism of vitamin A, which may help to make it more bioavailable.

If there's one ingredient that truly makes iVision™ the future of eye supplements, it's clinically-studied Lutemax® 2020. This powerful ingredient takes eye support to a whole new level by helping to support your eyes to reduce the blue light from digital devices and other artificial light sources like LED and compact fluorescent bulbs. Lutemax® 2020 also provides advanced support to the retina and inner eye, particularly the macula, which provides the clearest, most distinctive vision and manages the way your eyes process colors.

Lutein is an ingredient often used in eye supplements. However, today's digital lifestyle demands more than lutein alone. That is why Forever iVision™ with Lutemax® 2020 features all three carotenoids normally present in macular pigment: lutein, RR zeaxanthin and meso-zeaxanthin.

Forever iVision™ is the ideal daily supplement for young and old looking to support their eye's health and longevity. Everyone can benefit from the powerful ingredients contained in this advanced formula.

With the advanced ingredients supplied by Forever iVision™ with Lutemax® 2020, you'll see clearly why this is the perfect supplement for the digital age.

## NUTRITIONALS

### FAST FACTS

- Supports healthy vision
- Helps reduce the impact of blue light from digital devices
- Supports visual processing speed
- Provides all three carotenoids needed to support eye health

Gluten Free

### CONTENTS

60 Softgel Tablets

### DIRECTIONS

Take two softgels daily as a dietary supplement.

### CERTIFICATIONS

Kosher Certified, Halal Certified
